

Project Charter & Quality Management Plan

Project Charter

Project Title

Job Portal for Fresh Graduates

Project Description

This project aims to develop a job portal specifically for fresh graduates. Students will be able to create and upload their profiles, while employers can post job opportunities. An admin will manage and approve all listings. The system will also include an AI-based feature that matches student resumes with relevant job postings using keyword analysis.

Project Objectives

- To provide a centralized platform for fresh graduates to find jobs
- To allow employers to easily reach suitable candidates
- To automate candidate-job matching using AI techniques
- To ensure a simple and user-friendly interface

Scope of the Project

Included:

- Student profile creation and management
- Job posting by employers
- Admin approval system
- Resume-to-job matching feature

Excluded:

- Payment integration
- Advanced AI models (only basic keyword matching will be implemented)

Stakeholders

- Students (job seekers)
- Employers (job providers)
- Admin (system manager)
- Development team

Project Timeline

- Total duration: **6–8 weeks**
- Major phases: Planning, Development, Testing, Deployment

Roles and Responsibilities

- **Project Manager:** Oversees progress and manages deadlines
- **Developers:** Build frontend and backend
- **AI Developer:** Implements matching feature
- **Tester:** Ensures system quality and functionality

Quality Management Plan

The quality of the system will be maintained throughout the development process by following proper standards and regular checks.

Quality Objectives

- The system should be easy to use and responsive
- All features should work without errors
- The AI matching should provide relevant results
- Data should be handled securely

Quality Assurance

- Code will be reviewed regularly
- Proper documentation will be maintained
- Development will follow a structured approach

Quality Control

- Testing will be done at different stages (unit testing, system testing)
- Bugs will be identified and fixed before final submission
- User interface will be checked for usability

Testing Strategy

- **Functional Testing:** To ensure all features work correctly

- **Usability Testing:** To check ease of use
- **Performance Testing:** To ensure system runs smoothly

Acceptance Criteria

- All main features are working properly
- No major bugs remain
- System meets the defined requirements
- Basic AI matching is functioning correctly
